SLC-137C Color Waterproof Camera
With outstanding color image reproduction, the SLC-137C can be used in any color surveillance application. Submergible to 90’, the SLC-134C is truly a waterproof camera, designed to withstand even the worst downpour. A CCD imager by Sony delivers clear, crisp color; eight IR LEDs enable night vision during low light. A streamlined steel tube and adjustable sunshield are featured. Viewing angles are quickly adjusted with the swivel mounting bracket (supplied). Also included is a regulated power supply, mounting hardware, and a 65’ video / power cable.
